Employment History

I'm a career-changing developer with 10 years of high-end hospitality management experience, now pursuing my passion for technology and back-end development. While I'm new to the tech industry professionally, my decade in luxury hospitality has equipped me with skills that directly translate to software development: meticulous attention to detail, grace under pressure, and an unwavering commitment to excellence.

I'm currently working as Personal Assistant in Branding Company while dedicating every spare moment to mastering back-end development. I'm seeking my first role in tech where I can apply my strong work ethic, problem-solving abilities, and fresh perspective to contribute to a development team.
